Partners are Ready for Intel™ Arc® Pro B-Series

"Intel Arc GPUs shows a greater price/performance advantage compared with other competitor products. We are very much looking forward to further testing more of Intel's GPU products, especially the large memory GPUs required by Chinese customers, which can cover more all-in-one product needs." (Translated)

AsiaInfo 亚信科技

Meng Xiangde, General Manager
Artificial Intelligence Product R&D Center
https://www.asiainfo.com/

"The Yuge 3U 4GPU AI All-in-One Machine is powered by Intel W-series processors and Intel Arc Pro B60, delivering robust performance and significantly reducing corporate costs. It supports the operation of the DeepSeek-R1 32B large model. It can quickly build a company's own intelligent Q&A system, ensuring data privacy and security."

昱格®

Zhang Kang, CTO
YGE
https://www.ygeit.com/

"Intel's newest generation graphics card, Intel Arc Pro B60, with 24GB of video memory, can support algorithms with larger parameters, higher precision, and greater input volume, meeting the needs of high-precision, multi-concurrent task scenarios on campus. . In this new historical opportunity for technological innovation, seewo hopes to continue partnering with Intel to achieve mutual success in the market!" " (Translated)

CLAIM	SYSTEM CONFIGURATION	MEASUREMENT	MEASUREMENT PERIOD
Intel® Arc™ Pro B50 graphics executes faster in AI software than previous generation Intel® Arc™ Pro A50 graphics.	CPU : Intel® Core™ Ultra 9 processor 285K Motherboard : ROG MAXIMUS Z890 HERO, BIOS Version : 1801 Memory Model : G.SKILL Trident Z5 32GB (2x16GB) DDR5 6400 Storage : Corsair MP600 PRO XT 2TB Power Supply Model : Corsair RMX Series (2021), RM1000x Operating System: Windows 11 Pro – 24H2 Build 26100.3915 Memory Profile : XMP1 Resizable BAR : Enabled VBS : Enabled Defender : Enabled VT-d : Enabled Power Plan : Balanced Power Mode : Best Performance Graphics Driver Intel® Arc™ Pro B60: 32.0.101.6791 (pre-production engineering)	*All results are then normalized to the Intel® Arc™ A50. All tests run with desktop resolution of 1920x1080, unless otherwise stated. UL Procyon Computer Vision v1.9.496 (Procyon GUI v2.10.1729) Results are the geomean of the median of 3 runs of the FP32, FP16, and INT8 tests, measuring in overall score. Intel OpenVINO is used for Intel GPUs; NVIDIA TensorRT is used for NVIDIA GPUs. The higher the figure, the faster the performance.* UL Procyon Image Generation 1.1.206 (Stable Diffusion) (Procyon GUI v2.10.1729) Results are the geomean of the median of 3 runs of the Stable Diffusion 1.5 (FP16), Stable Diffusion 1.5 (INT8), and Stable Diffusion XL (FP16) tests, using measurements from these metrics: Seconds Per Image, Overall Time Taken, Batch #1 Seconds Per Image, UNET Duration, and Pipeline Duration Time. Intel OpenVINO is used for Intel GPUs; NVIDIA TensorRT is used for NVIDIA GPUs. The higher the figure, the faster the performance.* Geekbench AI v1.3.0 Results are the geomean of the median of 3 runs of the Full Precision, Half Precision, and Quantized tests, measuring in overall score. Intel OpenVINO is used for Intel GPUs; ONNX is used for NVIDIA GPUs. The higher the figure, the faster the performance.*	May 5-16, 2025
