
Device visibility is not a validated serving path
Solid: dependencies. Dashed: qualify the complete path.
Intel GPU
Intel Gaudi
Client NPU
Serving stack
vLLM XPU / SGLang XPU
or llama.cpp SYCL
Serving stack
Gaudi-specific engine
and compatible release
Serving stack
OpenVINO GenAI runtime
on the NPU plugin
Backend entry
torch.xpu
or engine-native SYCL
Backend entry
PyTorch hpu
Gaudi software stack
Backend entry
OpenVINO NPU plugin
not torch.xpu
Kernels / runtime
GPU kernels / libraries
SYCL + Level Zero
matching GPU driver
Kernels / runtime
Gaudi execution kernels
HCCL for collectives
matching Gaudi driver
Kernels / runtime
NPU execution kernels
compatible NPU runtime
matching NPU driver
Hardware
Discrete GPU
or integrated GPU
Hardware
Gaudi accelerator
not an Intel GPU
Hardware
Client NPU
not the integrated GPU
Qualification gate: the complete model-serving configuration
Weights + KV + workspace | operators + attention/cache path
Correctness + isolation | collectives (if used) | measured SLO
A visible device or a loaded model does not pass this gate.
Conceptual dependency map. No cross-device API or feature equivalence implied.
