

**Read the book two ways: layer-by-layer (parts) or question-by-question (traceability)
each chapter supplies a derived quantity, which feeds a decision**

Part I — The Token

↓ per-token price reduction

6.4 six-dim fingerprint

Part II — The Workload

↓ which model families

Part III — The System

↓ fit / conformance is embryo-bound

↓ GPUs ↓ warmsplit

Part IV — The Architecture

↓ synthesis deployment, reject

↓ fleet saturation/cloud/API

Part V — The Fleet

↓ fleet size multi-depth routing

file → log + rollback
↓ QPS vs host rollout

Part VI — The Architect

both have a green pad
↓ where the possible design
