
0 host (640 GB) fills as context grows
KV cache (grows with context)
weights 140 GB
runtime / NCCL ~64 GB
640 GB pool = 8×H100 HBM
20 GB KV
0 GB KV
approaches the ceiling —
KV, not weights, decides residency
8 GB KV
baseline (weights + runtime) is context-independent; the KV cache is the lever that grows with cont
